Attack Surface Management

Leveraging machine learning to predict and minimise exposure to breaches extending to third parties.

Understand your unique risk landscape and deploy resources where they matter the most.

More and more organisations face an unmanageable number of seemingly identical vulnerabilities to fix. Some of which are never exploited, resulting in wasted resources with no overall risk level impact.

Orpheus leverages threat intelligence to give you a fuller view of your unique risk, not just your vulnerabilities. Our intelligence-led risk management and rating platform uses machine learning to predict who is likely to attack you, using what methods, and through what live vulnerabilities. This is then extended to your third party, allowing you to understand your risk portfolio.

Benefits

- Monitor your consolidated risk profile including third parties.
- Efficiently prioritse risk that directly impacts data breach likelihood.
- Lower your cyber insurance cost.
- Validate your security measures and demonstrate ROI.
- Monitor third-party independently without spreadsheets or due diligence forms.
- Proactively improve your and suppliers' cyber maturity.
- Optimise internal resources and workload.

Third-Party Risk Monitoring
Single pane view of your risk portfolio. Actively monitor and reduce your associated risk and easily assess potential vendors.

Enhanced Cyber Risk Score
84 OVVS

Our proprietary score examines who is targeting you, their TTPs and maps it to your unpatched vulnerabilities being exploited in the wild.

Cyber Risk Reports
View a summary of overall cyber risk and how you can instantly reduce your score. Get alerted on alterations and discover how you compare against the sector average.

Actionable and Predictable Vulnerabilities
Patch vulnerabilities before exploitation with at least 94% accuracy when predicting future threats.

Explore our intelligence database
Access a collection of live and historical data on dark web chatter, vulnerability records, threat actors profiles, and more.

Analyst Reports and Requests
Access existent analyst-written research database and request bespoke reports on subjects relevant to you.

Uncover your extended risk in less than an hour. Sign up for a demo today.

About us

Orpheus is the only UK-government accredited cyber threat intelligence company providing cyber risk rating services. We are accredited to the highest level to provide threat intelligence for Critical National Infrastructure (CNI) organisations in the UK, and are trusted by major organisations worldwide to help them understand the cyber threats they face. Our powerful and award-winning technologies collect huge volumes of cyber risk data which we analyse using Machine Learning and our highly skilled team to enable you to stop your cyber risks before they happen.
