

Business Secure

At CommSec, we understand the complexity, confusion and cost that the vast number of solutions for Cyber security can create for small and medium sized businesses. Having anti-virus in place is no longer sufficient in protecting your business from modern threats, but it can be quite difficult to know what additional protections to put in place.

Cyber-attacks on Irish businesses continue to increase, up 31%* on 2020 and showing no sign of slowing down. A cyber-attack can be operationally and financially devastating for a business, but the risk of such an attack occurring can be hugely reduced by having good cyber security practises in place.

Business Secure is a revolutionary service that offers fully-managed cyber security protection for SMEs. Protect up to three devices per person, fully monitored by CommSec's security analysts.

Fully-Managed Cyber Security Protection

Enterprise-level cyber security for SMEs, helps reduce the risk of attacks including:

- RANSOMWARE
- PHISHING ATTACKS
- SMISHING
- BUSINESS EMAIL COMPROMISE
- ACCOUNT TAKE-OVERS
- MALWARE
- HACKING
- MAN-IN-THE-MIDDLE ATTACKS
- INVOICE REDIRECTION
- EXPLOITING VULNERABLE SOFTWARE

Cyber Insurance

Protecting your IT environment is paramount. However, CommSec Business Secure was also designed to assist small and medium-sized businesses in both securing their operations against threats not covered by some Cyber Insurance policies (such as fraud and ransomware) and satisfying conditions set down by insurance companies as a pre-requisite for obtaining Cyber Insurance policies. These include Multi-Factor Authentication (MFA), secure system back-ups, endpoint anti-virus, a firewall, device encryption, and a patch management procedure.

Key benefits of Business Secure

Comprehensive cyber security protection from cyber threats and vulnerabilities across your network, devices, and people – fully managed by CommSec's Security Operations Centre (SOC) Team

Protect multiple devices – up to 3 devices per user all for an affordable monthly or annual cost. Scale up and down the number of users as you need to - no minimum

Easy and fast deployment – typically we will begin deployment within 2 working days via remote connection

Gives enterprise-level protection and mitigates the risk leftover from most cyber insurance policies (i.e. loss of funds or revenue due to ransomware, malware and business email compromise)

Excellent ROI when compared to the cost of a cyber-attack, downtime, and the reputational damage caused by cyber attack

Access to CommSec's Security Operations Centre (SOC) for security-related queries and suspicious email activity

**I know the cyber security experts have my back
24/7, and whenever I need them”.**
