

DPO as a Service

CommSec's DPO as a Service will support organisations in becoming and staying compliant with GDPR requirements, in particular when the appointment of a DPO is mandatory for a wide range of organisations of any size processing large volumes of data or collecting and processing special categories of data. The DPO is tasked with not only managing education and training as related to GDPR mandates for data processing, but also for conducting security audits and serving as a point of contact for government officials.

Our DPO as a Service will be of particular value to businesses within the EU that do not have past experience in managing the introduction of new data protection regulations.

Multinationals with an EU presence or which do business with EU companies will also benefit from having subject matter experts focused on assisting with their GDPR-specific challenges.

Tactical & Strategic Support to Build Your Data Protection Programme

CommSec's team of experts can help you quickly set up and maintain a compliant DPO program. Our data protection professionals have decades of experience and expertise in information privacy and security as well as risk assessments and investigations on a global scale.

Best of all, by taking a strategic approach – one that aligns technology and operations decision-making with privacy legislation, standards, and best practices – you can ensure that your business complies with its data protection obligations.

Services and offerings:

- Promoting GDPR awareness, including providing customised training to everyone in the enterprise, from front-line employees to board members
- Identifying information assets and process flow used to create, store, transmit, and dispose of personal data and ascertaining if they are subject to GDPR specifications
- Assisting in creating a GDPR roadmap and maturity model
- Developing data maps that identify personal data as personally identifiable information and assigning risk according to the GDPR roadmap
- Coordinating recommended assessment action plans to identify gaps in relation to GDPR requirements, including developing and managing a GDPR compliance risk register
- Working with the client to address their unique needs in addition to the core set of services
- Managing potential data breaches and reporting to/liaising with the Data Protection Commission.

AS REGULATORS CONTINUE TO FOCUS ON DATA PRIVACY PROTECTION, THE REQUIREMENTS ARE OUTNUMBERING THE INDIVIDUALS WHO ARE AVAILABLE AND QUALIFIED TO TAKE ON THESE DUTIES. COUNT ON COMMSEC'S TEAM OF DATA PROTECTION CONSULTANTS TO NOT ONLY HELP YOU COMPLY, BUT ALSO TO BECOME MORE CYBER RESILIENT THROUGHOUT YOUR ENTIRE ORGANISATION.
