

About us

Orpheus is the only UK-government accredited cyber threat intelligence company providing cyber risk rating services. We are accredited to the highest level to provide threat intelligence for Critical National Infrastructure (CNI) organisations in the UK, and are trusted by major organisations worldwide to help them understand the cyber threats they face. Our powerful and award-winning technologies collect huge volumes of cyber risk data which we analyse using Machine Learning and our highly skilled team to enable you to stop your cyber risks before they happen.

Third Party Cyber Risk Management Platform

Orpheus has developed a unique, threat-led approach to Third Party cyber risk management.

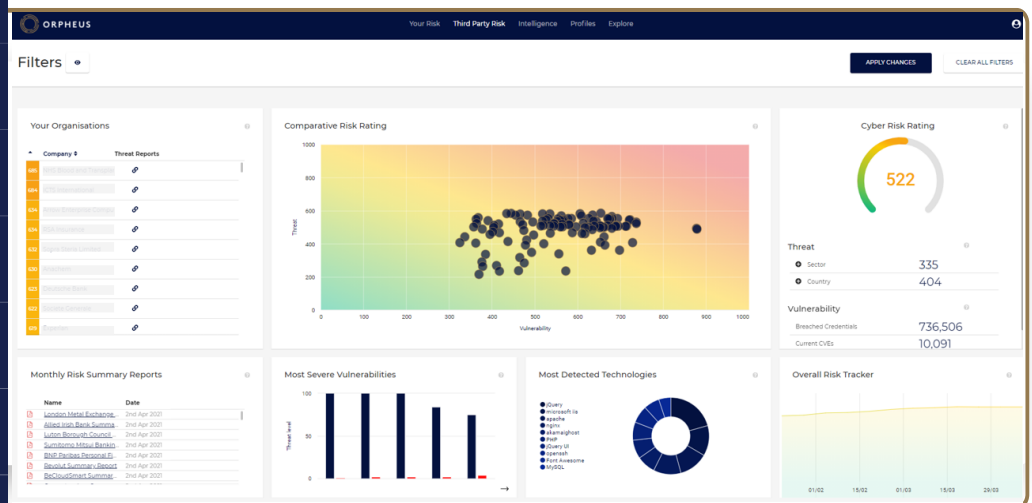

We deploy our expertise as a cyber threat intelligence company in combination with an assessment of the attack surface of your Third Parties to deliver an accurate cyber risk rating. Our approach enables continuous monitoring of your Third Parties as both the threats they face and their attack surface changes over time.

The platform displays all of the organisations you wish to monitor in a heat map, quickly highlighting organisations that pose the highest level of risk. The most critical vulnerabilities that your Third Parties have are also clearly displayed and we link those to our intelligence reports and Orpheus' CVE scoring to highlight why they are problematic. By providing the Risk context of the attack surface issues we can see your Third Parties have, it makes it easy to work with them to improve their security, and by association yours.

The Benefits

Our approach requires no input from third-party organisations making the platform quick and easy to set up. Within hours, clients can review the cyber risk of those they are working with. Continuous monitoring of suppliers reduces risk to the organisation when compared to point in time annual or quarterly reviews.

Access to the detail behind the scores means that clients can work with their suppliers to reduce the risk and confirm this work has taken place, rather than relying on their assurance alone.

Our Accreditations
