

About us

Orpheus is the only UK-government accredited cyber threat intelligence company providing cyber risk rating services. We are accredited to the highest level to provide threat intelligence for Critical National Infrastructure (CNI) organisations in the UK, and are trusted by major organisations worldwide to help them understand the cyber threats they face. Our powerful and award-winning technologies collect huge volumes of cyber risk data which we analyse using Machine Learning and our highly skilled team to enable you to stop your cyber risks before they happen.

Threat Intelligence

Orpheus is a leading cyber threat intelligence company, accredited by the UK's Bank of England and the FCA for what we do. Our sophisticated technology enables us to collect, index, store and analyse huge volumes of cyber threat intelligence data from a wide range of sources, both technical and non-technical. We then deploy sophisticated technologies - including Machine Learning - combined with expert analysts to deliver processed intelligence for your organisation.

We recognise that our clients need their reporting in a number of different ways, and we offer different levels of access - whether your role requires threat data, analysed threat intelligence reports or more strategic management-level reporting.

The Benefits

A security strategy that starts with threat intelligence is a good use of resources and is an approach promoted by international regulatory bodies.

A subscription to the Orpheus' Cyber Threat Intelligence platform turns data into actionable insights and provides clients with a complete understanding of the intent and capability that their adversaries have to target them given factors such as who they are, what they do and the technology they operate.

Orpheus' team of expert analysts provide threat actor profiles and comprehensive and easy-to-digest intelligence summaries, so you can quickly understand, communicate internally and respond faster to reveal unknown threats before they impact your business.
