

# Staying Ahead of Cyber Threats:

## Topform Securing Its Business for Future Growth

CommSec conducted a targeted cyber review for Topform, supported by an Enterprise Ireland cyber security grant. This initiative helped identify vulnerabilities and validate existing security measures, positioning the company for future growth.

### Overview

For over 50 years, Topform, a leading kitchen countertop manufacturer in Gort, Co. Galway, has built a reputation for innovation. With 50 employees and 50% of its products exported, the company continues to grow. However, this expansion brings increased cyber security risks.

To address these challenges, Topform partnered with CommSec through the Enterprise Ireland Cyber Security Grant, ensuring its digital infrastructure remains secure.

**80% OF THE €3,000  
ASSESSMENT  
COVERED BY THE GRANT.**

### The Challenge

- Growing cyber threats: Increasing ransomware and phishing attacks.
- Third-party security expectations: Large multinational clients require robust security measures.
- Ensuring business continuity: Digital transformation led to greater reliance on IT systems.

### The Solution

Topform engaged CommSec, a trusted cyber security specialist, to conduct a comprehensive Cyber Review. The Enterprise Ireland Grant covered 80% of the €3,000 assessment cost.

### Key Actions Taken:

- In-depth security audit based on NCSC-IE guidelines.
- Risk assessment & vulnerability testing.
- Actionable recommendations to strengthen defences.
- Collaboration with Topform's IT provider to implement improvements.

“CommSec was highly recommended by our IT provider, and after evaluating several cyber security partners, they clearly stood out as the most reviewed and highly rated option. I would confidently recommend CommSec for their unwavering dedication, thorough validation, and expert skillset in enhancing our security.”

**Paul Glynn, Chairman, Topform**

# Benefits of the EI Cyber Review

- **Expert Assessment:** Access to certified cybersecurity experts who will evaluate your current security measures and identify vulnerabilities.
- **Actionable Recommendations:** Receive a detailed report with practical steps to enhance your cyber security, following best practices from the National Cyber Security Centre (NCSC).
- **Tailored to Your Business:** The review is customised to your company's specific needs, ensuring relevant and impactful improvements.
- **Substantial Funding:** The grant covers 80% of the €3,000 assessment cost, making it a cost-effective way to improve security.
- **Enhanced Business Continuity:** Strengthen your defences against cyberattacks, ensuring your company's digital infrastructure is robust and future-ready.
- **Improved Risk Management:** Helps identify potential threats, assess their impact, and define your company's risk appetite.

## Results & Impact

- Enhanced security posture, reducing exposure to cyber threats.
- Improved risk management, ensuring compliance with industry standards.
- Validated existing security measures, reinforcing confidence in IT operations.
- Strengthened supply chain security, meeting client expectations.

## By the Numbers

- 50 years of industry experience
- 80% grant coverage on the Cyber Review
- €2-3 billion turnover of Topform's multinational clients
- 50% of products exported internationally

## Final Thoughts

"Cybercrime is a multi-billion-dollar industry. If you think you won't be targeted, think again. Businesses need to act now."

— Paul Glynn, Chairman, Topform

"While fear can drive action, potential should be the real motivator. Cyber security awareness fosters a forward-thinking, proactive company culture that stays ahead of the digital curve."

— Paul Browne, AI & Cyber Security Review Grant Lead

"We were delighted to work with Topform. Their openness and commitment to improvement ensured we could deliver the best assessment and value for the client. The insights gained will serve as a strong foundation for their continued cyber security and business growth journey."

**David McNamara,**  
Founder / CEO of
